

Mobile App Personalization

Maximize AOV and sales with personalized upsells and cross-sells in your clients' mobile channels

Leverage Tapcart's Custom Blocks to surface relevant product recommendations for your mobile app shoppers. The unique drag-and-drop block editor promotes a no-code / low-code experience for you to quickly add timely offers.

Use our pre-built Custom Block template that can be easily added to a mobile app, with little to no developer knowledge required. Manipulate the pre-built code to promote personalized upsells or cross-sells through Rebuy's AI endpoints or a custom Data Source.

Integration Benefits
